Introduction

Massachusetts is an anomaly in higher education because of the way it charges students to attend the University. In Massachusetts, the mandatory curriculum fees, rather than tuition, make up the bulk of the cost of attending the University of Massachusetts. Tuition, which has not increased in more than two decades, is set by the Massachusetts Board of Higher Education and is generally remitted to the State's general fund as a user fee.

In fiscal year 2015, the University remitted approximately \$31 million in tuition collected from in-state students. Fees, which account for the majority of student charges are set by the UMass Board of Trustees and are retained by the University to fund its operations. The fees have fluctuated over the years as the levels of state support provided in the State budget have changed. Over time, this has led to a high-fee, low-tuition billing model that is antiquated and confusing.

In July of 2015, the Legislature passed and the Governor signed into law provisions in the fiscal year 2016 State budget that would give the University the tools to adopt a new system of billing that conforms to national norms across higher ed. The ability for the state to retain tuition, also referred to as Tuition Retention, is the main provision of the law that will allow the University of Massachusetts to rationalize and restructure its tuition and fees in a way that is transparent and consistent with peer institutions across the nation.

Tuition retention was first suggested 24 years ago by the Saxon Commission, whose recommendations led to the formation of the UMass System as it exists today. The recommendation was advanced numerous times since, including in a 2004 report by the Massachusetts Taxpayers Foundation and in a more recent Higher Education Finance Commission report that was released in October of 2014.

The Higher Education Finance Commission recognized that restructuring tuition and fees is necessary if all community colleges, state universities and the UMass campuses are to increase accountability and transparency regarding the true cost of higher education in Massachusetts. The Commission recommended that full tuition retention be implemented at UMass by fiscal year 2117, or sooner and it strongly endorsed it for the state universities and community colleges to follow.

Tuition Retention is an important step toward making UMass more transparent to its students and their families by allowing them to see student charges in a way that alleviates much of the confusion that currently exists between tuition and mandatory fees. It is also in line with efforts nationally to make higher education more transparent and is consistent with the Administration's and the Legislature's calls for increased transparency. Finally, it allows the University to join the other public universities across the United States that are allowed to retain tuition.

The Tuition Retention Legislation

In fiscal year 2012, the Legislature expanded the University's authority to retain non-resident tuition to all five of its campuses. Prior to the change only the flagship campus at Amherst had the authority to retain non-resident tuition. In total, this allowed the campuses to retain \$39.6 million of tuition. However, tuition collected from in-state students continued to be remitted to the Commonwealth's General Fund.

The fiscal year 2016 budget included language granting the University the authority to retain in-state tuition. As passed by the Legislature the change results in no additional cost to the Commonwealth's budget or the University's budget. The State appropriation to the University would be reduced in fiscal year 2017 to account for the additional revenue being retained by the University (estimated to be between \$29 and \$31 million). In addition, any new or expanded tuition waivers will need to be paid for by the State.

The legislation included several other key provisions:

1. The University would establish an easy to understand student bill whereby tuition would comprise the majority of the total cost of student charges and allow the campuses to be competitive with their peer institutions.
2. Tuition waivers or credits would be cost neutral to the campuses and the goal is to make them more transparent to the student and their family.
3. The University would continue to receive fringe support for any employee funded using retained tuition, which is how the out-of-state tuition retention model was implemented. This is necessary for the University to continue to receive the fringe associated with employees previously paid with direct state appropriation.
4. The proposed language would give the UMass Board the authority to set student charges (what was formerly tuition and mandatory fees).

Benefits of the new legislation

Under the tuition retention plan, the University of Massachusetts would provide a "simple" bill of student charges that more accurately reflects the cost of education and separates out tuition and the cost of core education services from fees paid on other services such as housing, food, health care, and other specific programs and services for which fees are based on. The bill will also show the discount that in-state students receive through the State's support for public higher education.

The Task Force

In an effort to ensure greater transparency and help with the implementation of the new tuition retention law, President Marty Meehan established an Advisory Task Force on Tuition Retention whose membership is in Appendix A. In a letter to Secretary James Peyser dated July 16th, the President detailed the charge of the Task Force, which is consistent with language already included in section 195 of the State budget for fiscal year 2016 and will focus on all the relevant matters related to the implementation of tuition retention (See Appendix F). Specifically, the Task Force was charged with reviewing the following information which the University compiled:

1. An inventory of all tuition waivers and their value over the last five years by campus. The list also detailed which waivers are statutory, BHE approved, UMass approved and Commonwealth funded.
2. A list of all collectively bargained waivers by campus and their value over the last three years.
3. Recommendations for updating and establishing new policies and procedures for how changes in waivers will be managed going forward.
4. A list of all required reports produced by the University.
5. An analysis of the impact of tuition retention on the University's Fiscal Year 2017 budget.
6. An analysis on the impact of fringe benefits for both the state appropriation and on tuition retained by the University.
7. An analysis showing that the proposed budget adjustments needed to implement tuition retention are cost neutral to the Commonwealth and the University.

The Advisory Task Force was chaired by the President of the University of Massachusetts and included members from the Board of Trustees, the Amherst Chancellor, members of the Baker Administration, the Office of the Senate President and the Office of the Speaker of the House. Although the President's letter suggested a November 1st reporting date, it was agreed at the second Task Force meeting that it would take additional time to collect the amount of needed to complete the analysis called for above. It was agreed that the report would be filed at a time when there was some certainty that the data compiled was current and accurate.

Task Force Activities to Date

The Task Force met on two occasions at the UMass President's Office to review the data compiled by the University and the Department of Higher Education (DHE). In addition to the Task Force meetings, regular staff level meetings were held over the past 5 months with officials from the Administration, DHE, and the campuses to collect and discuss the data that was prepared for this report. See Appendix G for the agendas to the two Task Force meetings.

Recommendations of the Advisory Task Forces

The Task Force is advisory in nature and therefore the recommendations contained herein are subject to the approval University leadership or, in some cases the Board of Trustees. In many cases the recommendations may be required by statute. The detailed recommendations regarding fees and waivers are also subject to some changes as the Board considers these recommendations and approves changes that they feel are in the best interest of the students and their families. During its deliberations, the Task Force discussed bringing the following recommendations.

1. Revise the student bill in way that accomplishes the following objectives:
 - a. Simplified to be easier to navigate and understand charges

- b. Same format across the System
 - c. Common use of terms and definitions
 - d. Updated website for instructions on reading the student bill along with frequently asked questions and definitions of terms
 - e. Includes state subsidy for in-state students
2. As required by the statute, the fiscal year 2017 Budget request will reflect the following adjustments.
 - a. The fiscal year 2017 State Appropriation will be reduced by amount of tuition retained by the University based on the latest audited financials.
 - b. UMass will be allowed to charge fringe on any employee paid from tuition retained by the University provided that the amount available to charge salaries does not exceed the amount the University's appropriation is reduced by (estimated at \$31 million).
 3. Tuition and fees will be restructured in a way that ensures that tuition makes up the majority of student charges and eliminates the use of the mandatory curriculum fee.

Additional recommendations that have originated from the work of the Task Force but are not directly related to the implementation of tuition retention will be submitted to the UMass Board of Trustees and to the members of the Task Force under separate cover so that they can be reviewed by the Trustees and through UMass Board governance.

Inventory of Waivers:

The tuition waiver program was adopted to provide financial support to individuals and support access to public higher education institutions. The program has developed into numerous types of waivers for specific groups of individuals which can be determined by financial need, academic accomplishments, member of a specific category, etc. Waiver programs are created through statutory authority that either directly creates the waiver or provides the Board of Higher Education (BHE) with the authority to create waivers to meet certain program goals. These waivers are also governed by guidelines established by the BHE that outline eligible institutions, academic programs, and students, as well as define the waiver award value. Additionally, there is a class of waivers specific to the University which are approved and overseen by the BHE. The University is authorized to award a certain amount of waivers and determines the guidelines for eligibility.

Appendix D-1, D-2, and D-3 provide a complete inventory of the waiver programs along with a comprehensive overview of each waiver and historical data on their use. In order to more easily understand the programs, we have further divided the waivers into four categories to easily understand their origin and classify some of the differences between them. The categories are: Statutory – Appropriated, Statutory – Named, Statutory – BHE, and BHE – Campus. The first three categories denote a waiver that is specifically funded through a budget line-item, named in the General Laws, or approved by the BHE through the statutory authority to manage the waiver program. The final

category is for those waivers that are approved by the BHE but managed by the individual campuses. Additionally, we have classified waivers that are specific to UMass in order to denote those programs that are designated for UMass students and managed by the University.

The waiver inventory provides details on each program and shows the use of the waivers over the past five years. The inventory lays out the data into three parts for each year. The first is state-supported, or those with a state revenue impact, which shows the number of students receiving a waiver and the total dollar value of those waivers. The second is the non-state-supported students/programs, or those with a campus revenue impact, which shows the number of students receiving a waiver and the total dollar value of those waivers. The final section provides the total number of students receiving a waiver and the total dollar value for them. The inventory also provides a five-year average for each waiver and each section of reporting in order to illustrate trends and the impact of these waiver programs for students.

The inventory also outlines the most salient details of the waiver programs to provide a quick guide on the goals of each and the associated requirements. This overview offers a description of the waiver, the type of waiver according to the classification described earlier, the authorized maximum award, and eligibility requirements. A crucial part of this tab describes whether the guidance offered by the BHE or other sources requires updating due to the implementation of tuition retention. Many programs will require some type of update to guidance or narrative and this report highlights where we think changes are necessary.

The University continues to work with the Department of Higher Education to update language on certain waivers and to clarify to students and families what the value of their waivers will be once tuition retention is implemented. Most notably, recipients of the John and Abigail Adams Scholarship were notified early in the academic year that they are eligible for a tuition waiver at a public institution of higher education. We have adjusted the language in that letter to show the award as a credit towards tuition depending on the institution in which they choose to enroll. The work to revise BHE guidance language and other important informational items will be a significant undertaking in order to provide a consistent message on the new value of the tuition credits.

Finally, the report of waivers authorized through collective bargaining agreements. The analysis is an inventory of employee-based waivers and includes the Commonwealth (and abolished counties), DHE, UMass (generally), and UMass campus programs (including those established by policy/practice or by collective bargaining agreement). For each employee group, we have noted the benefit for employees, spouses (including domestic partners) and dependents, retirees, and deceased employees for state programs, curriculum fees, and continuing education programs. The inventory also includes links to the underlying authority document.

Generally, waivers offered through collective bargaining fall into one of three categories:

1. The Commonwealth - The Commonwealth program covers the largest group, but offers the smallest benefit: tuition only for active, full-time employees and spouses.
2. Department of Higher Education- The DHE program covers a smaller group (community college, state college/university, and UMass employees), and offers a more comprehensive program: dependents are included as well as spouses and dependents of retirees and deceased employees.
3. UMass- The UMass program covers only UMass employees, but offers the most comprehensive program: employees (as well as spouses and dependents) are covered for some curriculum fees and some campuses offer 100% of continuing education programs.

The collective bargaining agreements generally mirror or incorporate by reference one or more of the general programs, with variations generally concerning service requirements and who is eligible.

The tuition retention legislation requires that a complete inventory be filed with the Legislature on or before June 1, 2016.

How Waivers Will Change Under Tuition Retention:

The University will honor waivers currently in place at their current dollar value. Per the legislation, the University does not have to honor changes in the eligibility or the creation of new waivers unless they are funded by the State. The most significant change going forward is that waivers will be converted into tuition credits per legislation and will be applied to the overall student charges – the tuition amount charged by each campus. UMass has worked with DHE to break down the waivers into the following 3 categories for the purpose of governance and oversight:

1. The first categories of waivers are those that have been established by the DHE and apply to all three segments of higher education. These waivers will continue to be offered at the University as a defined credit towards tuition at their current value. The table below lists the various waivers that fall into this category. Some already are fully funded through a separate appropriation by the State.

National Guard	DCF Adopted Children	DCF Foster Care Child
Active Duty Armed Forces	Commission for the Blind	MA Rehabilitation Commission
Native American	Senior citizens	Veterans/Vietnam

		veterans
S.Z. Koplik Cert. of Mastery	Valedictorian	John and Abigail Adams Scholarship

2. Waivers that have been adopted by DHE, but will be administered by UMass. These programs will have guidelines consistent with DHE guidance thereby making the programs consistent with state universities and community colleges but will be administered by the University and the value of the credit waiver will be determined by the University.

Need-based	Aspiring Teachers	Career Adv. Program
Cooperative Association of States for Scholarship	Collaborative Teachers	High Tech. Scholar/Intern
Hurricane Katrina	BHE UPLAN	Graduate Student
Washington Center	Commonwealth Sept. 11, 2001	Children of Fallen Service Member
MassTransfer (Joint Admissions/Tuition Advantage Program)		

3. UMass Tuition (formerly waiver) Credit Programs. These waivers will now fall under the authority of the UMass Board. UMass will therefore have the authority to define campus and/or system based tuition waivers, identify the general requirements of these types of aid and the designated value of the tuition credit. Any new campus and/or system based tuition credits or adjustments and their requisite value require approval of the President and annual reporting on these credits.

Appendix D1 – Total and Five-year Average

The Total and Five-year Average document provides a view of the various waiver programs administered by the University. In fiscal year 2015, the University awarded over \$56 million in tuition waivers to 29,962 students. In fiscal year 2015, over \$31 million in tuition waivers was revenue that would have been remitted to the state if it had not been waived. Over \$24.9 million in tuition waivers was campus revenue waived through the various programs. On the left hand side of the document the waiver programs are listed and sub-totaled by categories describing their origin and sources. The data is presented to show the most recent year, fiscal year 2015, with available data and a five-year average detailing the utilization of the waiver. The number of students receiving a waiver and the total value of the waivers in shown in each revenue categories. The state supported column currently has a state revenue impact while the non-state supported column has a campus revenue impact. The data is aggregated to show a total number of students utilizing the program and the total value of the waivers.

Appendix D2 – Total Waivers by Campus

The Total Waivers by Campus document provides a view of the waiver program at each campus. On an annual basis each campus prepares utilization data for every waiver program to show both value and utilization by students. The data is reported annually to the Massachusetts Department of Higher Education in a similar format to the appendix document. On the left hand side of the document the waiver programs are listed and sub-totaled by categories describing their origin and sources. The data is presented to show the most recent year, fiscal year 2015, with available data detailing the utilization of the waiver. The number of students receiving a waiver and the total value of the waivers in shown in each revenue categories. The state supported column currently has a state revenue impact while the non-state supported column has a campus revenue impact. The data is aggregated to show a total number of students utilizing the program and the total value of the waivers.

Appendix D3 – Tuition Waiver Programs and Guidelines

The Tuition Waiver Programs and Guidelines document inventories each waiver program awarded and administered by the Department of Higher Education, the University, local campus, or affiliated agencies. The waiver programs are listed on the far-left column of the document. Each program is outlined with a brief description about the program, categorized into waiver type, and identified if it is UMass specific. The document also provides the legal citation for each program, the authorized maximum award, other specific eligibility requirements, and notes on potential changes to guidance for each waiver program.

Tuition and Fee Restructuring:

The University's current fee structure is derived from the provisions of Board Policy T92-031 Appendix E. This policy establishes approval authority for student fees and outlines four separate fee categories from which our fee schedules have been developed. The fee categories outlined in the policy are: Mandatory Student Charges (Table 1), Non-Mandatory Student Fees (Table 2), Sales and Service and Administrative Charges (Table 3), and other fee based charges (Table 4). The President's Office issues guidance to the campuses each fiscal year to ensure consistency in the preparation of the fee tables for the following fiscal year. In June of this year the UMass Board will adopt a revised policy reflecting changes in the tables, particularly in table one which will no longer include the mandatory curriculum fee.

Tuition rates have historically been set by the State's Board of Higher Education while fees have been approved by the University's Board of Trustees. With the recent legislation granting full tuition retention to the University, the Board of Trustees has now been given the ability to set tuition rates. However, that ability comes with the mandate to create a simpler student bill with a standard structure across campuses and the majority of student charges coming in the form of tuition.

To satisfy the requirements of the tuition retention legislation, the President's Office has prepared reports which combine the tuition, mandatory curriculum fees, and certain other mandatory fees into a broader tuition category to show what student charges might look like in the future. With the new student charge structure, the percentage of mandatory student charges attributed to tuition at the four undergraduate campuses increases from 12-33% to 91-100%. The Board has not yet formally adopted this recommendation and the schedules are still subject to change.

Restructuring of Mandatory Fees

The University set out to have all the mandatory fees treated consistently across the campuses. Based on the current proposals, all four undergraduate campuses are in agreement on the treatment of the mandatory fees. For undergraduate students, all mandatory fees will be rolled into tuition except for the technology fee and student

activity fee. The table below shows the mandatory fee schedule before and after. For the purposes of this conversation, it might be best to focus on just the undergraduate campuses which is why the last fees listed on the table are in italics.

Before

Fee	AMH Amount	BOS Amount	DAR Amount	LOW Amount	WOR Amount
MANDATORY CURRICULUM FEE	SEPARATE	SEPARATE	SEPARATE	SEPARATE	SEPARATE
Technology Fee	\$ 250	\$ 250	\$ 250	\$ 250	
Student Activity Fee	\$ 131	\$ 72	\$ 155	\$ 925	
Student Activity Fee (Graduate)		\$ 102			
Athletics		\$ 177	\$ 275		
Campus Center Fee		\$ 130	\$ 160		
Undergraduate Service Fee	\$ 1,419				
Graduate Service Fee	\$ 1,165				
Graduate Student Senate	\$ 120				
Health Services Fee	\$ 687	\$ 167	\$ 150	\$ -	
<i>Equipment Fee</i>					\$ 325
<i>Assessment Fee</i>					\$ 600
<i>Simulation Fee (CELS)</i>					\$ 200
<i>Health Assessment Lab Fee</i>					\$ 495
<i>Standardized Patient Lab Fee</i>					\$ 175
	\$ 3,772	\$ 898	\$ 990	\$ 1,175	\$ 1,795

After

Fee	AMH Amount	BOS Amount	DAR Amount	LOW Amount	WOR Amount
MANDATORY CURRICULUM FEE	IN TUITION	IN TUITION	IN TUITION	IN TUITION	IN TUITION
Technology Fee	\$ 250	\$ 250	\$ 250	\$ 250	
Student Activity Fee	\$ 131	\$ 72	\$ 155	\$ 125	
Student Activity Fee (Graduate)		\$ 102			
Athletics					
Campus Center Fee					
Undergraduate Service Fee					
Graduate Service Fee	\$ 1,165				
Graduate Student Senate	\$ 120				
Health Services Fee					
<i>Equipment Fee</i>					\$ 325
<i>Assessment Fee</i>					\$ 600
<i>Simulation Fee (CELS)</i>					\$ 200
<i>Health Assessment Lab Fee</i>					\$ 495
<i>Standardized Patient Lab Fee</i>					\$ 175
	\$ 1,666	\$ 424	\$ 405	\$ 375	\$ 1,795

Below is a description of the proposed changes by campus.

- Amherst – proposing to roll the \$1,419 undergraduate service fee and student health fee into tuition, while maintaining the technology fee and student activity fee as separate fees. For graduate students, only the curriculum support fee will be rolled into tuition.
- Boston – proposing to roll all mandatory fees from table 1 into tuition except the student activity fee and the technology fee.

- Dartmouth – proposing to roll all mandatory fees from table 1 into tuition except the student fee and technology fee. Dartmouth will also collapse the transcript fee and orientation fee into a new fee called “New Student Fee”.
- Lowell – proposing to roll the athletic portion of the student activity fee into tuition and to keep the remaining \$125 as a separate student activity fee. They are also proposing to roll two one-time fees from Table 2 — the First Year Student Fee (\$200) and Graduation Fee (\$200) into tuition at a lower rate of \$100. They are also proposing to eliminate the Readmission Fee from Table 3.
- Medical School – Proposing to roll the mandatory curriculum fee into tuition and maintaining all other mandatory fees.

As illustrated in the “AFTER” table, Amherst, Boston, Dartmouth, and Lowell are in agreement that their technology fee and student activity fee should be the only mandatory fees that are kept separate from tuition, consistent with how it is treated by peer institutions.

Additional Considerations

The table below displays the inter-campus tuition and fee comparison for in-state undergraduate students. The undergraduate campuses will achieve relative consistency when comparing tuition versus fees, with the flagship Amherst campus having the highest tuition amount.

Campus	Tuition	Fees		Tuition and Fees
Amherst	\$13,790	\$381		\$14,171
Boston	\$12,360	\$322		\$12,682
Dartmouth	\$12,183	\$405		\$12,588
Lowell	\$13,152	\$375		\$13,527

The proposed tuition and fee approach now more closely aligns the UMass campuses with their peers.

Appendix E1 – Fiscal Year 2017 Proposed Tuition Summary

This document is a summary of the tuition, curriculum fees, and mandatory fees for each campus before and after the proposed tuition restructuring. This document assumes that each campus will combine tuition and the curriculum fee, and all four undergraduate campuses will add all other mandatory fees into tuition except for the student activity fee and technology fee. The Amherst graduate service fee is also kept separate from tuition.

Appendix E2 – Fiscal Year 2017 Proposed Tuition by Campus

This document is similar to Appendix E1 but provides more detail into the mandatory fees at each campus.

Changes in the Student Bills

Changes in the student bill will be consistent with the following guidelines provided for in statute:

- Presentation - simple/understandable to anyone
- Consistent across the campuses – layout, titles, descriptors, etc.
- Comparable to peer bills
- Include state subsidy on the bill

The proposed changes were broken down into two phases. The first phase would be completed in time for the fall 2016 billing cycle and the second phase will include work that would continue on and would be incorporated into future releases.

Phase 1 Recommendations:

- Titles, descriptions and organization of fees along with using consistent vocabulary across all the campuses. For example:
 - Technology Fee
 - Anticipated Aid – change name to Estimated Aid
 - In-state and out-of-state (versus resident/non)
 - Descriptive language clearly stating a fee is one time (if applicable)
 - Mandatory fees that continue to fall outside tuition will now be called other student fees
- Group different categories of fees and segregate by use of a blank line (ex: tuition, continuing education, room & board, etc. will be the major categories)
- Change the order in the way financial aid is sorted: institutional, state, federal, loans
- Prior invoice balance will be moved on the bill to be in line with the rest of the charges
- Titles and description of waivers (credits) the same across the campuses
- Will show the state subsidy in narrative format
- Campuses will review, update and create, if necessary, job aids to clearly explain the student bill. Links to job aids should be displayed prominently.
- Analysis will include bills from peer institutions to show comparisons.
- Launch a focus group for student and parents to gather more insight and to help inform future enhancements.

Impact on the Fiscal Year 2017 State Appropriation

The University's fiscal year 2017 budget request will look different than previous years because the Legislature passed and the Governor signed into law provisions in the fiscal year 2016 state budget that allows the University to retain tuition received from in-state undergraduates. Prior to the change in law, tuition from in-state students was remitted to the Commonwealth's General Fund.

One of the key tenets of the tuition retention legislation is that it provided cost neutrality for both the University and the state. As the University develops the fiscal year 2017 budget, the impact of tuition retention must be considered to ensure the legislation

remains cost neutral as it is intended. To do this, the University will build its request starting from the prior year's base appropriation, add in the amount being requested to support the University in fiscal year 2017 and subtract off the value of the amount of tuition that will be retained. For the purposes of estimating, the amount retained is assumed to be consistent with the amount retained in fiscal year 2015 or \$31 million; however, this amount could be lower in fiscal year 2016 and 2017.

For FY17, the University of Massachusetts is requesting an increase in its base appropriation of \$62 million, not including fringe support, for fiscal year 2017. The University has identified a total need of approximately \$111 million, but has been able to reduce that estimate through enrollment growth and increased efficiency efforts across the System. Overall, this request is approximately \$7 million less than estimates we projected in October. After reforecasting their budgets mid-year, campuses were able to reflect additional savings and efficiencies that have occurred this year into their projections for upcoming fiscal year. The table below shows the buildup of the state appropriation as it would be funded in the state budget not including the additional fringe support tied to any personnel funded through state appropriations.

FY17 State Budget Request	Before Tuition Retention	After Tuition Retention
FY16 State Budget: Base Appropriation	\$ 534,007,373	\$ 502,952,373
FY17 Increased State Funding Requested	\$ 61,950,000	\$ 61,950,000
Total FY17 Requested State Appropriation (1)	\$ 595,957,373	\$ 564,902,373
\$ Change from FY16 State Budget	\$ 61,950,000	\$ 61,950,000
% Change from FY16 State Budget	12%	12%
(1) Does not include fringe support provided on all State Appropriations		

For fiscal year 2017, the amount of state appropriation each campus receives will be reduced by an amount equal to the increase in the tuition they will retain going forward. Per statute, the campuses are able to use these funds to pay for employee salaries and the State will continue to cover the fringe benefits as they did when the funds were appropriated (as opposed to retained by the campuses directly). As an estimate, the amount of tuition remitted by each campus for fiscal year 2015 was as follows (the estimates will be similar in fiscal years 2016 and 2017, but will vary slightly):

<u>Amherst</u>	<u>Boston</u>	<u>Dartmouth</u>	<u>Lowell</u>	<u>Worcester</u>	<u>TOTAL</u>
(13,000,454)	(3,805,664)	(4,227,911)	(7,191,670)	(2,828,871)	(31,054,570)

In turn, the State will eliminate the amount of tuition it receives each year in the General Fund from tuition remitted by each campus. It will also decrease the state appropriation to the University by an equal amount. Normally this would result in the loss of fringe for the University, but as stated above, this will be mitigated by allowing campuses to receive benefits on any employees paid from retained tuition. As an example of how this transaction will look from the perspective of the State and the

University, the table below shows fiscal year 2016 budget and anticipated in-state tuition. The difference in the pre and post tuition retention is that the transaction is cost neutral to both the State and the University:

UNIVERSITY REVENUES	Pre-TR	Post - TR
FY16 Appropriation; Estimated Tuition	University	University
State Appropriation	531,807,373	500,753,373
Tuition Remitted to State	(31,054,000)	-
TOTAL	500,753,373	500,753,373
STATE REVENUES	Pre-TR	Post - TR
FY16 Appropriation; Estimated Tuition	State	State
State Appropriation	531,807,373	500,753,373
Tuition Received from University	(31,054,000)	-
TOTAL	500,753,373	500,753,373

Because the University's fiscal year 2017 budget will ultimately look different, it will be important to communicate the impact of tuition retention and to ensure that other budgetary changes to the state appropriation (increases or decreases) are identified and analyzed separately.

A further explanation of fringe Support

The Commonwealth pays the fringe benefits for University employees paid from the state appropriation; this is true of any State agencies or quasi agency. As such, the University has been forced to use the state appropriation for salaries so that we collect fringe benefits for our employees. Because fringe benefits (primarily health and pension) are paid centrally by the State from other appropriated funds the benefit to the University is not seen in the state appropriation as it published in the annual budget. As such, the University develops a separate schedule published annually in the Audited Financial Statements to more accurately reflect the support provided by the State inclusive of both the direct appropriation and fringe support.

Since fringe support is effectively additional state funding for the University's budget, it is critical to consider this in the context of changes to the state appropriation. Because of this, the legislation contemplated a change to the appropriation based on tuition retention and provided a mechanism to ensure that it would not result in a reduction of State support to the University. Section 73 subsection (i) of the tuition retention legislation included the following language:

(i) For the purposes of calculating and funding the fringe benefits for employees whose salaries are paid from retained tuition at the university as provided for in subsection (e), all fringe benefits and collective bargaining costs of employees paid from retained tuition shall not exceed the amount of tuition remitted to the commonwealth as reported in the university's audited financial statements for fiscal year end June 30, 2016 and provided that said amount shall continue to be paid annually under said subsection (e).

This language essentially means that for the purposes of fringe, any employee paid from the in-state tuition now retained by the campus will be treated as though they are paid from state appropriation for the purposes of collective bargaining and fringe support. Without such language, the University would lose approximately \$10 million in state support as illustrated below.

Fringe Calculated	FY16 <u>Pre-TR</u>	FY16 <u>Post-TR</u> (No Adjustment)	FY16 <u>Post-TR</u> (Adjusted Per Legislation)
State Appropriation	531,807,373	500,807,373	500,807,373
Out of State TR Fringe	39,583,000	39,583,000	39,583,000
In State TR Fringe			31,000,000
Plus Fringe Benefits for State Employees	176,102,513	166,548,313	176,102,513
Fringe Rate	30.82%	30.82%	30.82%

It should be noted that the fringe support provided by the State as outlined above is not the total cost of fringe for University employees. In fact, the University pays the State close to \$100 million annually for fringe costs associated with employees paid from a source other than the state appropriation even though they are state employees and receive the same benefits. The cost of fringe rate changes annually is set by the State, increases in salaries by collective bargaining agreements and additional faculty and staff hired by the University can also impact the total amount of fringe paid annually.

Fringe Benefits Costs	FY15
State Funded (Additional State Support)	159,400,000
University Funded (Paid to the State)	98,400,000
Total Fringe	257,800,000

In an effort to more clearly reflect the cost of employee benefits at the University, the Tuition Retention Task Force will further study the topic of fringe and report on it in more detail at a later time.

(c) The feasibility and relative benefits of including the total cost of fringe benefits for employees of the university paid with state appropriations in the base appropriation of the university beginning on July 1, 2016, and shifting the associated obligation of paying the university's actual fringe benefit costs for all employees of the university to the university beginning on July 1, 2016;

This study is currently underway and the results will be further discussed for potential changes in the future to how the State funds the University.

University Reporting

The University of Massachusetts' approach to planning begins with the System's mission statement and goals developed and approved by the Board of Trustees, which provide the foundation for specific strategic plans designed by each of the five campuses.

Each campus has a strategic plan that they are working toward. Each campus, and the System Office, operate on a July 1st to June 30th fiscal year. Campuses begin developing their budgets at the department level nearly seven months before the start of the fiscal year. The operating budget for each of the campuses and the System are detailed individually in the University's operating budget and approved by the Board every June.

The Board of Trustees' review and approval of the operating budget coincides with their review and approval of student charges for the upcoming academic year. The total amount of state support received by the University has a major impact on the amount of tuition and fees that will be approved; therefore, the outcome of the student charges becomes a significant milestone in the annual budget process.

In February, the budget office at each of the campuses begin formulating estimates for the campuses general operating funds based on projected enrollment, anticipated level of state appropriations, student fee and tuition revenue, interest earnings, indirect cost recovery from grants and other unrestricted operating, auxiliary and grant and contract revenues, as well as expected changes in fixed and variable costs. The allocations are reworked throughout the spring as the enrollment and budget outlook becomes clearer and the campuses begin working with each of the departments, schools and colleges.

In the spring, the various planning committees on the campus get involved in the budget process. On most campuses departments generally begin the fiscal year with the same budget they received in the previous year. Depending upon the overall situation of the state budget, the unrestricted undesignated budgets, comprised primarily of the state appropriation and tuition and fee revenue, are not finalized until early in the fiscal year after the state appropriation has been determined and actual enrollment data is available. Once the student charge vote is passed and the state appropriation is finalized, the Chancellor and campus leadership determine final budget allocations to departments within the University. In addition, each department, school and college is required to provide year-end projections at mid-year to support updates to campus operating budgets.

The UMass System Office also uses this information to report on the University's operating budgets, capital budgets, academic programs, and performance data. These reports are often detailed at the system and campus levels. These reports include data on enrollment, budget and financial projections, capital projects and bond financing, annual financial and performance indicators just to highlight a few. Throughout the fiscal year University leadership reviews these reports with the Board in public

meetings. For example the Administration and Finance Committee of the Board reviews the following:

- Each June we review and approve the annual fiscal year budget along with fees (not to include Tuition and Fees) that will be charged to students for the coming school year.
- December we review the University's audited financial statements and key financial metrics that indicate performance during the prior year.
- During the winter we complete our five-year financial forecast of revenues and expenses which drives our overall state budget request
- In the spring we report on financial and present peer comparison of key metrics selected by the Board.
- In addition, each quarter we provide the Board with updates on the University's capital plan, changes to metrics selected by the Board and displayed in an executive dashboard - all of which help inform the University's decision making.

Many of the reports issued on an annual basis are reviewed by other Committees such as the Committee on Academic and Student Affairs, the Advancement Committee, the Committee of the Whole and in some cases the full Board. Examples of these reports include the University's research expenditures, student enrollment and success, diversity data of our students and staff and crime statistics.

In addition to the many reports described above and those listed in Appendix H, the Tuition Retention legislation provides for some additional reports on the part of the University.

One-time Waiver Report:

Per the tuition retention legislation, the University of Massachusetts shall report to the Senate and House Committees on Ways and Means, the Joint Committee on Higher Education and the Board of Higher Education on the existence and the calculated value of all tuition waivers, grants and scholarships identified in chapter 15A of the General Laws or any other general or special law and reductions collectively bargained for in the form of a tuition or fee waiver at the University of Massachusetts. The report shall be submitted not later than August 1, 2016

Ongoing Reporting:

Each year university will report to the Senate and House Committees on Ways and Means, the Joint Committee on Higher Education, the Secretary of Administration and Finance and the Secretary of Education on:

- (i) The status of the percentage of student education costs placed upon the student and subsidized by the commonwealth
- (ii) A comprehensive document articulating the efficiencies and effectiveness of initiatives and programs at the university that save the commonwealth and students money and make the 5-campus system more efficient.

Appendices to the Report

- A. List of Task Force Members
- B. Tuition Retention Legislation
- C. Summary of Tuition Retention Legislation
- D. Inventory of Waivers
 - 1. Fiscal Year 2015 Total and Five-year Average
 - 2. Total Waivers by Campus
 - 3. Inventory of collective bargaining waivers
- E. Fee Schedules
 - 1. Summary of Tuition and Mandatory Fees
 - 2. Tuition and Mandatory Fees by Campus
- F. President's July 16th Letter to Secretary Peyser
- G. Advisory Task Force Meeting Agendas
- H. List of annual reports prepared by UMass

APPENDIX A

Task Force Membership

* may appoint a designee to serve in their place

Martin Meehan, President *

UMass

Chair of the Advisory Task Force

Kumble R. Subbaswamy, Chancellor

UMass Amherst (Representative of the of the five campuses)

Designee: Chris Dunn

Stanley C. Rosenberg, Senate President*

Designee: Anna Freedman

Robert A. DeLeo, Speaker of the House*

Designee: Michele Lisio

Kristen Lepore, Secretary*

Administration and Finance

Designee: Bob Ross

Jim Peyser, Secretary*

Education

Designee: Tom Moreau

Carlos E. Santiago, Commissioner*

Department of Higher Education

Designee: Sean Nelson

James Buonomo, UMass Trustees

Chair, Committee on Administration and Finance

Maria Furman, UMass Trustee

Chair, Audit Committee

Alyce Lee, UMass Trustee

Chair, Committee on Academic and Student Affairs

APPENDIX B

UMass Tuition Retention

SECTION 36. Section 9 of said chapter 15A, as so appearing, is hereby amended by striking out, in lines 75 to 79, inclusive, the words “In the case of the university, the council shall review the recommendations of the board of trustees relative to tuition rates at said university and its campuses. Said tuition rates shall be subject to the approval of the council” and inserting in place thereof the following words:- Tuition rates shall be subject to the approval of the council; provided, however, that tuition rates at the University of Massachusetts shall be subject to sections 1A and 1B of chapter 75 and shall not require the approval of the council.

SECTION 37. Said section 9 of said chapter 15A, as so appearing, is hereby further amended by striking out, in line 84, the words “public institution of higher education” and inserting in place thereof the following words:- state university and community college.

SECTION 72. Section 1A of chapter 75 of the General Laws, as so appearing, is hereby amended by striking out, in lines 150 and 151, the words “; (p) submit recommendations to the council for approval for tuition rates at the university”.

SECTION 73. Said chapter 75 is hereby further amended by inserting after section 1A the following section:-

Section 1B. (a) For the purposes of this section, the following words shall have the following meanings unless the context clearly requires otherwise:

“Student charges”, in-state and out-of-state tuition and fees that are charged to students for general attendance at the university; provided, however, that “student charges” shall not include any fee or other charge established by the university that is specific to a particular course, program or activity or any charges for room, board or student health insurance.

“Student tuition credit”, a reduction in student charges for an eligible student.

(b) The board of trustees shall fix and establish student charges for the university. In-state tuition and mandatory student charges shall preserve affordability for residents of the commonwealth. Out-of-state student charges shall appropriately balance the financial needs of the university with the need to be competitive with peer institutions and, to the extent possible, cover, at a minimum, the actual cost of a student’s education. Tuition shall comprise the majority portion of student charges. In establishing student charges, the board of trustees shall consider factors including: (i) the Consumer Price Index published by the Bureau of Labor Statistics in the United States Department of Labor; (ii) the Higher Education Price Index calculated by Commonfund; (iii) tuition

and fee rates at peer institutions; (iv) collective bargaining costs; (v) total support from the commonwealth, including direct appropriations and support for capital construction and maintenance; and (vi) other relevant data and measures. The board shall increase in-state student charges by no more than is necessary to adequately fund the university.

(c) All student charges received by the university under this section shall be retained by the university in a revolving trust fund and shall be expended as the board of trustees directs for the operation and support of the university. Any balance remaining in the trust fund at the close of a fiscal year shall continue to be held in the trust fund, shall remain available for expenditure in subsequent fiscal years and shall not revert to the General Fund. The trust fund shall be subject to audit by the state auditor.

(d) The university shall provide to each student a detailed statement of all student charges. The statement shall be in a form approved by the board of trustees and shall include a breakdown of the student charges and show the discount rate for in-state students and the discount for a student who is eligible for a tuition credit.

(e) For employees of the university whose salaries are paid from tuition retained under subsection (c), fringe benefits and collective bargaining shall be funded as if those employees' salaries were supported by state appropriations and the funds shall not be assessed as fringe. This subsection shall apply only to fringe benefits and collective bargaining costs associated with salaries paid from retained tuition.

(f) All tuition waivers, grants and scholarships identified in chapter 15A or any other general or special law and reductions collectively bargained for that are in the form of tuition or fee waivers shall be student tuition credits. Students that are eligible for a tuition credit shall have their student charges reduced by the amount of the tuition credit.

(g) The board of trustees shall not accept any tuition waivers, grants or scholarships identified in chapter 15A or any other general or special law or reductions collectively bargained for that are in the form of tuition or fee waivers established on or after July 1, 2016 unless the reduction is accompanied with an appropriation that fully supports the reduction or the reduction is approved by the board of trustees.

(h) The university shall report annually not later than March 1 to the senate and house committees on ways and means, the joint committee on higher education, the secretary of administration and finance and the secretary of education on: (i) the status of the percentage of student education costs placed upon the student and subsidized by the commonwealth; and (ii) a comprehensive document articulating the efficiencies and

effectiveness of initiatives and programs at the university that save the commonwealth and students money and make the 5-campus system more efficient.

(i) For the purposes of calculating and funding the fringe benefits for employees whose salaries are paid from retained tuition at the university as provided for in subsection (e), all fringe benefits and collective bargaining costs of employees paid from retained tuition shall not exceed the amount of tuition remitted to the commonwealth as reported in the university's audited financial statements for fiscal year end June 30, 2016 and provided that said amount shall continue to be paid annually under said subsection (e).

SECTION 174. (a) Notwithstanding any general or special law to the contrary, the University of Massachusetts shall classify as a student tuition credit as defined in section 1B of chapter 75 of the General Laws all tuition waivers, grants and scholarships identified in chapter 15A of the General Laws or any other general or special law and all reductions collectively bargained for that are in the form of a tuition or fee waiver available to students as student tuition credits.

(b) The University of Massachusetts shall calculate the value of all tuition waivers authorized under section 19 of chapter 15A of the General Laws, or any other general or special law, and all collectively bargained for reductions existing on July 1, 2016.

(c) The University of Massachusetts shall credit to eligible students the calculated value of the tuition waivers, grants and scholarships identified in chapter 15A of the General Laws, or any other general or special law, and reductions collectively bargained for in the form of a tuition or fee waiver calculated in subsection (b) as a student tuition credit on the student's statement of student charges as defined in section 1B of chapter 75 of the General Laws.

(d) The University of Massachusetts shall report to the senate and house committees on ways and means, the joint committee on higher education and the board of higher education on the existence and the calculated value of all tuition waivers, grants and scholarships identified in chapter 15A of the General Laws or any other general or special law and reductions collectively bargained for in the form of a tuition or fee waiver at the University of Massachusetts. The report shall be submitted not later than August 1, 2016.

SECTION 175. Notwithstanding any general or special law to the contrary, all tuition and fee waivers that are exclusive to the University of Massachusetts shall require only the approval by the board of trustees of the University of Massachusetts.

SECTION 195. Not later than January 31, 2016, the president of the University of Massachusetts shall study and report to the secretary of administration and finance, the secretary of education, the university's board of trustees and the house and senate

committees on ways and means on the following matters related to tuition retention and the implementation of sections 36, 37, 72, 73, 174 and 175:

(a) Calculations and recommendations relative to the value of all tuition waivers authorized under section 19 of chapter 15A of the General Laws, or any other general or special law, and all collectively bargained for reductions existing on July 1, 2016 and recommendations for procedures and approval mechanisms for changes in the value of student tuition credits;

(b) Recommendations for specific budgetary and financial information that may be included in an annual report to be used to develop the annual university budget and increase transparency; provided, further that the recommendations shall include, but not be limited to, (i) a list of required reporting and auditing of revenue and expenditures supporting operation of the university, as presented in the university's consolidated audited financial statements, the 5-year capital plan, all auxiliary functions and quasi-public entities that provide service or support to the university or its campuses in fulfillment of the requirements of section 10 of chapter 75 of the General Laws and (ii) the annual reporting required to monitor progress in meeting the goals of and fidelity to such plans, as required pursuant to said section;

(c) The feasibility and relative benefits of including the total cost of fringe benefits for employees of the university paid with state appropriations in the base appropriation of the university beginning on July 1, 2016, and shifting the associated obligation of paying the university's actual fringe benefit costs for all employees of the university to the university beginning on July 1, 2016; and

(d) Recommendations for any reduction or increase to the university's base appropriation in fiscal year 2017

SECTION 211. Sections 36, 37, 38, 44, 72, 73, 119, 174 and 175 shall take effect on July 1, 2016

APPENDIX C

Summary of the Tuition Retention Legislation

Chapter 46 of the Acts of 2015, the General Appropriation Act for Fiscal Year 2016, includes sections 36,37,72,73,174,175,195,211 which together grants the University the authority to retain in-State-tuition and provides for other changes in law as summarized below

Section 73. New section in chapter 75 that gives UMass Board of Trustees the exclusive authority to set tuition and fees at the University, allows the campuses to keep tuition paid for by in-state students that had been previously remitted to the General Fund and mandates that the University present a simple bill to students where the majority of the cost of attendance at the 5 campus system is tuition. It also solves other related issues with the move to a high tuition low fee model, fringe benefits for employees paid by state appropriation and existing tuition waivers.

- **Subsection (a)-** Defines two new terms of art, “student charges” which is the cost of attendance at the campuses, minus any fee for auxiliary services or fee for special courses, programs or activities; and “student tuition credit”, a credit off of the total student bill for any existing tuition, fee and tuition and fee waiver in existing law or through collective bargaining. The existing tuition and fee waivers are such things as John and Abigail Adams scholarships, veteran tuition waivers, community college graduate tuition waivers, etc.
- **Subsection (b) -** Gives the UMass BOT power over the setting of all tuition and fees at the University. The section makes clear the tuition and fee increases shall be done with consideration around the CPI index, HEP index, peer institutions, collective bargaining obligations and state support along with other relevant industry and financial factors.
- **Subsection (c) -** All tuition and fees paid by students and parents shall be retained by the University. Obligates the University to provide a simple bill for our students where tuition makes up the majority of the cost of attendance at the campuses. The bill will reflect, for in-state students, in clear terms, the state subsidy they are receiving as a result of the Commonwealth’s commitment to higher education. The bill will reflect any student tuition credits (existing tuition, fee and tuition or fee waivers) that students are eligible for. The section sets up a revolving fund to keep tuition at the campuses that had previously been remitted to the Commonwealth.
- **Subsection (d)-** Provides that the state shall continue to pay the fringe benefits and collective bargaining costs of all employees whose salaries are paid from retained tuition. This language is modeled after section 25 of chapter 45 of the acts of 2005 that granted out of state tuition retention to the Amherst campus amongst others.
- **Subsection (e) -** Turns all existing tuition, fee and tuition and fee waivers into student tuition credits and provides that those student tuition credits will continue to be honored to students at UMass.

- **Subsection (f)**- Mandates that all future student tuition credits or other future tuition, fee or tuition and fee waivers passed after July 1, 2016 must be accompanied by a state appropriation that covers the full costs of the reduction.
- **Subsection (i)** – Establishes that the amount of tuition remitted to the Commonwealth as of June 30, 2106 is the amount by which the State appropriation to the University will be reduced in FY17. It also caps, at the same amount, the total fringe benefits and collective bargaining costs that will be paid by the Commonwealth for employees paid from retained tuition.

Sections 36, 37 and 72. Remove the power of the Board of Higher Education from approving tuition increases at the University, setting up a tuition and fee structure that is in line with peer institutions and that will provide students and their parents with a bill that is sensible and easy to understand.

Section 174. Is an outside section that looks to value all our existing tuition and fee waivers as of July 1, 2016 and provides that UMass will honor all tuition and fee waivers in place moving forward.

- **Subsection (a)** - Reiterates that all existing statutory and collectively bargained tuition, fee and tuition and fee waivers shall be known as student tuition credits.
 - **Subsection (b)** - On July 1, 2016 UMass will calculate exactly what each of the existing statutory or collectively bargained tuition waivers are worth.
 - **Subsection (c)** - States that UMass will honor all existing statutory and collectively bargained tuition, fee and tuition and fee waivers as student tuition credits for students at UMass.
 - **Subsection (d)**- Requires a one-time UMass report to the Joint Committee on Higher Education, the Senate and House Committees on Ways and Means and the Board of Higher Education that provides the value of the existing statutory and collectively bargained tuition, fee and tuition and fee waivers.
- **Section 175.** Provides that those tuition and fee waivers and reductions that are exclusive to the University of Massachusetts shall only require approval of the UMass Board of Trustees. This includes division 1 athletic scholarships and UMass Exchange Tuition Waivers Programs.
 - **Section 211.** Establishes an effective date of July 1, 2016 (Fiscal Year 2017) giving the University time to implement the plan.

University of Massachusetts
Amherst • Boston • Dartmouth • Lowell • Medical School • UMassOnline

Martin T. Meehan
President

July 16, 2015

James A. Peyser, Secretary of Education
Executive Office of Education
One Ashburton Place – Room 1403
Boston, MA 02108

Dear Secretary Peyser,

First, I want to reiterate what an historical achievement it would be for UMass to have full tuition retention – making it more accountable and transparent to its students and their families. With the signing of tuition retention into law, UMass would join the rest of the public universities in the United States which are allowed to retain all of their tuition, and as a result will be able to present student charges in a way that alleviates the confusion that currently exists between tuition and mandatory fees.

To help implement the new tuition retention law, UMass will establish an Advisory Task Force on Tuition Retention. The task force shall be chaired by the President of the University of Massachusetts or his designee, and shall include a Chancellor from one of the five UMass campuses or his designee, the Senate President or his designee, the Speaker of the House or his designee, the Secretary of Education or his designee, the Secretary for Administration and Finance or her designee, the Commissioner of the Department of Higher Education or his designee and the Chairs of the UMass Board Subcommittees for Administration and Finance, Academic and Student Affairs and Audit. The task force will report its findings on or before November 1, 2015, to the House and Senate Committees on Ways and Means and the Secretary for Administration and Finance, the Commissioner of Higher Education, the State Comptroller and other key members of your Administration. The review will be consistent with the reporting language already contained in section 195 of the Fiscal Year (FY) 2016 General Appropriations Act and will focus on the following matters related to the implementation of tuition retention:

- a) Calculations and recommendations relative to the value of all tuition waivers authorized under section 19 of chapter 15A of the General Laws, or any other general or special law; all collectively bargained reductions in place as of July 1, 2016; and recommendations for procedures and approval mechanisms for changes in the value of student tuition credits.
- b) Specific budgetary and financial information to be reported to the Secretary for Administration and Finance, the Chairs of the House and Senate Committees on Ways and Means, the Co-Chairs of the Joint Committee on Higher Education and the State Comptroller. Such recommendations shall include, but not be limited to:

- I. a list of required reporting and auditing of revenue and expenditures supporting the operation of the University, including all auxiliary functions and quasi-public entities that provide service or support to the University or its campuses in fulfillment of the requirements of section 10 of chapter 75 of the General Laws; this list shall include a breakdown of information that is required to be reported at the campus level, the system level, or at both levels; and
 - II. a list of all enrollment, budget and financial data, including data relating to capital projects and financing to be collected in support of the 5-year master plan required under the provisions of section 1A(1) of chapter 75 of the General Laws and the annual reporting required to monitor progress in meeting the goals of and fidelity to such plans, as required pursuant to section 1A(m) of said chapter 75.
- c) The feasibility and relative benefits of including the total cost of fringe benefits for employees of the University paid with state appropriations in the base appropriation of the University beginning on July 1, 2016, and shifting the associated obligation of paying the University's actual fringe benefit costs for all employees of the University to the University beginning on July 1, 2016.
- d) Any reduction or increase to the University's base appropriation in FY17, reflecting the projected reduction in appropriation equal to the amount of in-state tuition retained by the University as a direct result of the implementation of tuition retention; the projected increase necessary to pay fringe benefits of employees paid with in-state tuitions dollars retained as a direct result of tuition retention; and the amount necessary to pay fringe benefits of employees paid from out-of-state tuitions dollars retained by the University.
- e) The University's Advisory Task Force on Tuition Retention will recommend to the University's Board a process that will inform the University's full Board of Trustees of the rationale for its tuition and fee recommendation for the FY17 budget. The process will:
- I. assess the impact of tuition and fee rates on student access and affordability, program and institutional quality, and the effect on national and international rankings;
 - II. consider the University's efforts on controlling costs through its efficiency and effectiveness efforts without impacting quality metrics;
 - III. benchmark the University's proposed mandatory tuition and fee charges and operating costs against peer institutions and consider the impact of proposed fee rates against other relevant economic indicators;
 - IV. take into consideration whether the Commonwealth has appropriately funded the University in areas including, but not limited to: the State appropriation, Commonwealth Capital Funding Allocation, Deferred Maintenance Funding on Commonwealth Buildings and the Statutory Funding of Collective Bargaining Contracts under chapter 150E of the General Laws.

James A. Peyser, Secretary of Education
July 16, 2015
Page 3

- V. The University will present to the Board information consistent with this process prior to taking any vote on tuition and mandatory fees.

UMass is committed to working collaboratively and openly with your Administration and legislative leadership to address these issues in a way that best serves our students and their families. I look forward to our continued dialogue on these matters. Please do not hesitate to contact me should you have any questions.

Sincerely,

Martin T. Meehan
President
